

Cloud init :

Create ubuntu VM > In custom data we can add cloud init script .manually > Allow port 80  
> Create .

## Create a virtual machine ...

Select a VM application to install

### Custom data and cloud init

Pass a cloud-init script, configuration file, or other data into the virtual machine **while it is being provisioned**. The data will be saved on the VM in a known location. [Learn more about custom data for VMs](#) ↗

Custom data

```
#cloud-config
package_upgrade: true
packages:
- nginx
```

SCRIPT :

```
#cloud-config
package_upgrade: true
packages:
- nginx
```

This script is telling you to install all packages in vm .

NGINX should be accessible with public ip .

20.127.169.62

## Welcome to nginx!

If you see this page, the nginx web server is successfully installed and working. Further configuration is required.

For online documentation and support please refer to [nginx.org](https://nginx.org).  
Commercial support is available at [nginx.com](https://nginx.com).

*Thank you for using nginx.*
